- Concept and layout machinery and equipment by CAD
- Selection of and negotiation with sub-suppliers
- Definition of technical requirements
- System integration of sub-suppliers' and Digatron products
- Supervision of equipment manufacturing and installation at final destination
- Commissioning and hand-over to the customer

New Face

Ludek Heller, Project Manager

Ludek Heller was born on 20 October 1960 in Ceska Lipa, Czech Republic. Beside Czech he speaks German, Russian and English.

After his professional education as industrial electrician in 1978 he started first working experiences at Czech National Railways in the field of Diesel-electric drives. From 1986 to 1991 Ludek Heller studied at the Technical University in Prague and graduated successfully as Engineer in the field of hydraulic and pneumatic machinery and equipment.

From 1993 to 2002 he was employed at Varta, Ceska Lipa, initially as Vice Production Manager and after in a responsible position in the field of projection and process technology. In his last position he was employed as Project Manager at Siemens in Prague. He therefore fulfills the qualification for a successful project management at Digatron.

He spends his free time by doing handcrafts with wooden material, by cycling and travelling. He has got two children, 12 and 14 years old.
