## Friedel Leisten, Commissioning & Final Inspection

We are very pleased to announce that as of 16th January 2008 Friedel Leisten has joined Digatron Aachen as master technician in the area of commissioning and final inspection of our equipment.

Friedel will be responsible for the performance of the 'end of production line testing', e.g. compliance with specifications, quality checks and final calibration prior to delivery. He will also organize the administration of the affiliated paper work, like calibration certificates, inspection documents and revised schematics.

Friedel Leisten was born on 6th March 1968 in Düren/Germany.

After his professional education as electrician he graduated successfully from the Master Craftsman School in Aachen with the Master Craftsman's Degree in 1992.

He worked as master electrician craftsman for 15 years in the field of electrical installations for industrial applications.

In his last position he was employed as service technician responsible for servicing several biogas plants.

Friedel is married and has three children. His hobbies are computers and voluntary work with the fire brigade.
