

New Face

We are pleased to announce that as of 1 March 2008 Marcus Müller will join Digatron Aachen as development engineer.

His duties will be the development of hard- and software for embedded-systems focussed on switch mode power electronics.

## Marcus Müller, Development Engineer

Marcus Müller was born in Erfurt/Germany on 2 Oct. 1980.

He completed an apprenticeship in power electronics and worked in this profession for another four years. In 2003 he received his degree as certified technician with distinction.

With this degree he was accepted to study electrical engineering at the Advanced Technical College in Aachen. He graduated in March 2008 and received his masters degree with an A+. His degree dissertation with the title "bi-directional chopper for lithium formation" was supervised by Hubert Mertens, Digatron Aachen.

Marcus Müller likes inline-skating, badminton and working out at a gym. Besides this he is interested in light and audio engineering.
